# Nikkala Harathi

**Engineer Trainee | Full Stack Web Development | JavaScript • Python • SQL**

+91 6281561137 | harathinikkala@gmail.com | LinkedIn | GitHub

## CAREER OBJECTIVE

B.Tech CSE student (CGPA 9.01/10, graduating 2027) with full-stack internship experience, web projects in HTML, CSS, JavaScript and SQL, and hands-on work in Python and Generative AI (RAG, semantic search). Seeking an Engineer Trainee role in platform development to build reliable, user-friendly web applications, learn modern frameworks, and collaborate with developers and cross-functional teams.

## EDUCATION

**B.Tech in Computer Science Engineering** – GMR Institute of Technology, Rajam *2023 – 2027 | CGPA: 9.01/10*

**Intermediate (MPC)** – Sri Chaitanya College, Visakhapatnam *2021 – 2023 | 980/1000*

**SSC** – A.P. Model School, Pathapatnam *2021 | 10/10*

## TECHNICAL SKILLS

**Web Development:** JavaScript, HTML, CSS, building and deploying web application features
**Programming:** Python, Java, C, SQL
**Databases:** SQL, DBMS fundamentals
**AI / LLM:** Generative AI, RAG (Retrieval-Augmented Generation), semantic search, LangChain, OpenAI API
**Fundamentals:** Data Structures & Algorithms, OOP, debugging & problem solving
**Tools:** Git, GitHub, VS Code, IntelliJ IDEA, PyCharm, Jupyter
**Data & ML:** NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, OpenCV
**Professional:** Teamwork, Communication, Attention to Detail, Ownership, Willingness to learn

## EXPERIENCE

**Full Stack Developer Intern** | DataValley, Visakhapatnam *2025*

- Built and deployed web application features using HTML, CSS, JavaScript and SQL as part of a development team.
- Worked with team members to understand requirements, troubleshoot issues and deliver features on time.

## PROJECTS

**LocalConnect – Local Business & Service Finder Portal** (HTML, CSS, JavaScript, SQL)

- Built a web platform for discovering local businesses and services, backed by a SQL database.
- Added search filters, reviews and ratings features to improve usability.

**AI Chatbot Using RAG** (Python, LangChain, OpenAI)

- Developed a RAG-based chatbot for document question answering.
- Implemented semantic search to return accurate, context-based responses.

**AI-Based Millets Quality Detection** (Python, TensorFlow, OpenCV)

- Developed a CNN-based system for millet quality classification and defect detection.

## CERTIFICATIONS

- Generative AI for Beginners – Coursera (2025)
- Introduction to Cybersecurity – Cisco (In Progress)
- Object-Oriented Programming in Java – Coursera (2024)
- Ethical Hacking – NPTEL (2025)
- DSA with Java – Jenny's Lectures (In Progress)

## ACHIEVEMENTS

- Solved 600+ problems on CodeChef and 150+ on LeetCode.
- Participated in team events: Hackathon Anveshana 2026, WebAstra and GameCrafts.

## LANGUAGES

English, Telugu
